URL encoding the space character: + or %20?

As the aforementioned RFC does not include any reference of encoding spaces as +, I guess using %20 is the way to go today. For example, "%20" is the percent-encoding for the binary

A html space is showing as %2520 instead of %20

312 A bit of explaining as to what that %2520 is :
The common space character is encoded as %20 as you noted yourself. The % character is encoded as %25. The way you get

When should space be encoded to plus (+) or %20?

Sometimes the spaces get URL encoded to the +

The origin on why '%20' is used as a space in URLs

I am interested in knowing why '%20' is used as a space in URLs, particularly why %20 was used and why we even need it in the first place.

sign, and some other times to %20. What is the difference and why should this happen?

Upgraded SSMS from SSMS 20 to SSMS 21

After upgrading from SQL Server Management Studio (SSMS) v20 to SSMS v21, the "Integration Services Catalogs" is no longer visible. Steps to reproduce Upgrade SSMS

In a URL, should spaces be encoded using %20 or +?

@MetaByter I think it is more technically correct to phrase the question as "In a URL, should I encode the spaces using %20 or + in the query part of a URL?" because while the example you show

[Pre-engineered Container Power Storage , Sano Energy](#)

SES-500/1000K- 20ft Container BESS is a pre-engineered power storage system housed in a 20-foot shipping container. It is equipped with batteries, inverters,

20-foot energy storage container

The energy storage battery system adopts 1500V non-walk-in container design, and the box integrates energy storage battery clusters, DC convergence cabinets,
