

**After changing the generator
the air conditioner has no air**

Overview

If your air conditioner isn't functioning on a generator, first check the generator's wattage output to ensure it meets your AC's power requirements. Next, inspect electrical connections for damage, clean the AC filters, and ensure the circuit breakers are functioning properly.

After changing the generator the air conditioner has no air

[Component fans always at full speed after latest windows 10 update](#)

After the latest Windows 10 update, the component fans on my PC (thinking it's probably mainly the PSU) are blasting at full speed full time, despite being set to only rev up when internal

Cannot open People app after Reset

Cannot open People app after Reset I've been having problems with the People app, so I went to Setting>System>Apps & features to reset it. I clicked on People, then Advanced options.
