

**Collect solar energy to generate
electricity 24 hours a day**

Overview

Solar energy can generate continuous electricity, day and night, thanks to battery storage systems. The drop in battery prices has enabled 24/365 solar energy projects in various regions of the world. Backup technology and hybrid systems increase autonomy and energy security in.

Collect solar energy to generate electricity 24 hours a day

Offering clean energy around the clock

MIT spinout 247Solar is building high-temperature, concentrated solar power systems that use overnight thermal energy storage to provide round

24-hour solar now economically viable for the world's sunniest regions

The report demonstrates that it is possible to achieve nearly constant solar electricity every hour of every day of the year, highlighting the real-world potential of "24/365 solar generation"
