

# Electric Wind Blade Power Station

## Overview

---

Wind flows over the blades creating lift (similar to the effect on airplane wings), which causes the blades to turn.

Wind turbine design is the process of defining the form and configuration of a wind turbine to extract energy from the wind. An installation consists of the systems needed to capture the wind's energy, point the turbine into the wind, convert mechanical rotation into electrical power, and other systems to start, stop, and control the turbine. In 1919, German physicist Albert Betz showed that for a hypothetical ideal wind-energy
