

European Flow Battery Energy Storage

Overview

Construction work to build the world's largest flow battery has commenced at the strategic and critically important electrical grid interconnection point on the borders of German, France and Switzerland, enabling the system to stabilise electricity flows across national borders and.

European Flow Battery Energy Storage

[Europe's largest flow battery project launched to boost](#)

The flow battery system will be able to store energy for hours or even days, to maintain grid stability during periods of low wind and solar output.

FLOW BATTERY TARGETS

Long-duration energy storage in particular is vital to guarantee both the availability of reliable energy as well as energy security in Europe. Within this context, flow batteries are an essential solution to
