

Flexible photovoltaic support construction

Overview

Flexible photovoltaic (PV) support structures are widely used due to their large span, high land-use efficiency, low construction cost, and short construction periods. However, they exhibit low stiffness, light weight, and low damping, making them wind-sensitive and prone to.

Flexible photovoltaic support construction

Contact - Endurance Surfaces

Endurance Surfaces has supplied rubber matting for over 30 years. Our durable, flexible mats are made from 100% natural rubber, are non-slip, easy clean, and suitable for indoor and outdoor use. We

Flexible photovoltaic support construction method

In order to respond to the national goal of "carbon neutralization" and make more rational and effective use of photovoltaic resources, combined with the actual photovoltaic substation project, a fixed
