Solar power

OverviewTechnologiesPotentialDevelopment and deploymentEconomicsGrid integrationEnvironmental effectsPolitics

Solar power plants use one of two technologies:
o Photovoltaic (PV) systems use solar panels, either on rooftops or in ground-mounted solar farms, converting sunlight directly into electric power.
o Concentrated solar power (CSP) systems use mirrors or lenses to concentrate

sunlight to extreme heat to make steam, which drives a turbine to generate electricity.

Solar explained

Solar photovoltaic cells are grouped in panels, and panels can be grouped into arrays of different sizes to power water pumps, power individual homes, or provide utility-scale electricity

Delaying your period with hormonal birth control

Delaying periods is possible with an extended or ongoing method of birth control. Find out how to have more control over the menstrual cycle.
