Overview History Attributes Design Operation Specific energy and energy density Applications Development

Pissoort mentioned the possibility of VRFBs in the 1930s. NASA researchers and Pellegrini and Spaziante followed suit in the 1970s, but neither was successful. Maria Skyllas-Kazacos presented the first successful demonstration of an All-Vanadium Redox Flow Battery employing dissolved vanadium in a solution of sulfuric acid in the 1980s. Her design used sulfuric acid electrolytes, and was patented by the University of New South Wales
