

Grid-connected photovoltaic panels in the community

Overview

The first generation of community solar - typically midsize, grid-connected solar projects that community members or organizations can subscribe to - enabled greater access to solar energy in many US states. However, community solar has the potential to do far more for communities.

Grid-connected photovoltaic panels in the community

Energy for All: Community Solar

GRID Alternatives is a national leader in community solar for low-income and underserved communities, as a developer, installation contractor, project and program partner, workforce development and

Distribution Grid Impacts of Community Solar
