

How do high-rise buildings use solar energy to generate electricity

How do high-rise buildings use solar energy to generate electricity

[How to use the solar energy sent by high-rise buildings](#)

Equipment used to collect this energy, primarily photovoltaic panels, tap into sunlight to convert it into usable electricity. Given that urban areas are

[Solar Energy for High-Rise Buildings: Challenges and](#)

By adopting technologies like BIPV, vertical solar panels, and advanced energy storage, high-rise buildings can significantly reduce their

How well do face masks protect against COVID-19?

Face masks can help slow the spread of coronavirus disease 2019 (COVID-19). Learn about mask types, which masks to use and how to use them.

Statin side effects: Weigh the benefits and risks

The body needs cholesterol. But having too much cholesterol in the blood raises the risk of heart attacks and strokes. Statins block an enzyme the liver needs to make cholesterol. This

[Osteopathic medicine: What kind of doctor is a D.O.?](#)

You know what M.D. means, but what does D.O.

Maximizing Vertical Solar Power: Case Study on High

Explore how vertical solar arrays on high-rise buildings can generate up to 58 MWh annually. Learn how SolarEdge optimizers overcome shading

Triglycerides: Why do they matter?

Why do high triglycerides matter? High triglycerides may contribute to hardening of the arteries or thickening of the artery walls, called arteriosclerosis. This condition increases the risk of

[Automated external defibrillators: Do you need an AED?](#)

mean? What's different and what's alike between these two kinds of health care providers?

Arthritis pain: Do's and don'ts

Arthritis is a leading cause of pain and limited mobility worldwide. There's plenty of advice on managing arthritis and similar conditions with exercise, medicines and stress management. But

[Acute sinusitis: Do over-the-counter treatments help?](#)

Medicine you can get without a prescription may give some relief from acute sinusitis symptoms.

An automated external defibrillator (AED) is a portable device that can be used to treat a person whose heart has suddenly stopped working. This condition is called sudden cardiac arrest.

[Weight training: Do's and don'ts of proper technique](#)

You might learn weight training techniques by watching friends or others in the gym, but sometimes what you see isn't safe. Weight training technique that isn't proper can lead to muscle

Cardiopulmonary resuscitation (CPR): First aid

Cardiopulmonary resuscitation (CPR) is an emergency treatment that's done when someone's breathing or heartbeat has stopped. For example, when someone has sudden cardiac

Exercise: How much do I need every day?

You can do strength training by using weight machines or weights, your own body weight, heavy bags or resistance bands. You also can use resistance paddles in the water or do activities
