

How to configure the module of solar base station

Overview

This guide walks through the entire build: selecting parts, assembling the electronics, flashing MeshCore repeater firmware, configuring the node via CLI, weatherproofing the enclosure, sizing solar for harsh climates (including North Dakota winters), and deploying the.

How to configure the module of solar base station

command line

Also I tried following commands which gcc , which cc and which g++ and only last one returned path to g++. Other commands returned nothing. I downloaded GCC archive, build it and

[What does --prefix do exactly when used in ./configure?](#)

When you run `./configure --prefix= directory`, you are indicating that the software should be installed under the directory directory. But this rarely, if ever, places loose files in directory.

[Can not run configure command: "No such file or directory"](#)

I'm trying to install a Debian package from source (via git). I downloaded the package, changed to the package's directory and ran `./configure` command but it returned `bash: ./configure: No`
