

# How to read Asia s first 10MW tower solar thermal power station

## Overview

---

This review systematically synthesizes recent advancements across core SPT components, including TES materials, receiver designs, heliostat field and tracking, and modeling tools, while uniquely integrating artificial intelligence (AI), Internet of Things, and cyber-physical systems.

### Solar Power Tower

Although the first SPT pilot plant called Solar One with a capacity of 10 MW was built in California in 1982, it was not until 2011 that the first the first commercial-scale SPT plant (19.9 MW capacity),

A solar power tower, also known as 'central tower' power plant or 'heliostat' power plant, is a type of solar furnace using a tower to receive focused sunlight. It uses an array of flat, movable mirrors (called heliostats) to focus the sun's rays upon a collector tower (the target). Concentrating Solar Power (CSP) systems are seen as one viable solution for renewable, pollution-free energy.
