When to use the !important property in CSS

The use of !important is very important in email creation when inline CSS is the correct answer. It is used in conjunction with @media to change the layout when viewing on different platforms.

[What are the implications of using "!important" in CSS?](#)

Using the !important keyword in CSS is a way to prevent other meddling programs from taking liberties to interpret your html/css in a way other than what you want. For example when someone

How to apply !important using .css ()?

```
$("#elem").css("width", "100px !important");
```

This does nothing; no width style whatsoever is applied. Is there a jQuery-ish way of applying such a style without having to overwrite cssText

Is it bad to use !important in a CSS property?

Use !important for development to quickly identify a problem in the cascade, but then fix the problem. It's best to use the least amount of specificity in CSS rules to get something to work.

[More important than !important \(a higher level !important\)?](#)

Material UI and TypeScript: How to use !important?

Material UI and TypeScript: How to use !important? Ask Question Asked 7 years, 5 months ago Modified 2 years, 10 months ago

In general, it is possible to override a declaration that has !important by using a rule that also has it and that has higher specificity. However, a declaration in a style attribute has, by
