

Is it possible to build solar power generation on a reservoir

Overview

Floating photovoltaic (FPV) solar panels are an emerging application of solar power, involving the installation of PV modules on buoyant platforms on water bodies such as reservoirs and lakes.

Is it possible to build solar power generation on a reservoir

Possible

Possible is an adjective. If something is possible, it can be done or achieved. It is possible for us to measure the amount of rain. Some improvement may be possible.

possible

possible: Capable of happening, existing, or being true without contradicting proven facts, laws, or circumstances.

Gila River Tribes Intend to Float Solar Panels

In a 2021 paper published with NREL, Reclamation estimated that floating solar on its reservoirs could generate

[Energy production and water savings from floating solar](#)

Reservoir Data Meteorological Data FPV Generation Electricity Demands of Cities Water Savings Limitations Reporting Summary To improve on prior estimates of FPV generation potential globally, we combined three global reservoir databases (GRanD49, GeoDAR50 and OSM51). These three databases contain spatial polygons for 7,250, 19,548 and 108,332 reservoirs larger than 0.01 km², respectively. GRanD includes detailed reservoir attributes for 2,481 hydroelectric power and 118 See more on nature
