LIQUID Definition & Meaning

The meaning of LIQUID is flowing freely like water. How to use liquid in a sentence.

[LIQUID definition in American English , Collins English Dictionary](#)

A liquid is a substance which is not solid but which flows and can be poured, for example, water. Drink plenty of liquid. Boil for 20 minutes until the liquid has reduced by half.

Liquid

Liquids are a form of condensed matter alongside solids, and a form of fluid alongside gases. A liquid is composed of atoms or molecules held together by intermolecular bonds of intermediate strength.

A liquid is one of the three main states of matter, along with solids and gases. It is made up of tiny particles, such as ions or molecules, that are close together but not as tightly packed as in solids.

What Is a Liquid?

The following figures show the microscopic behavior of the atoms in liquid argon and the molecules in liquid bromine and liquid water. Note how the molecules in a liquid move as units.

Liquid

Unlike a solid, a liquid has no fixed shape, but instead has a characteristic readiness to flow and therefore takes on the shape of any container. Unlike a gas, a liquid usually has a volume that
