

Monitoring solar container system for 2 hours

LFP12V100

Overview

In this Instructables, I will show you I have made a simple Solar Monitoring System by using an ESP32 development board and ACS723 current sensor. Input Voltage - 0- 24V (Can be extended up to 50V) 2.

Monitoring solar container system for 2 hours

What Is Monitoring

Monitoring is a process of observing and tracking activities and progress. It is a critical component of any successful project, intervention, public policy or program. Monitoring is an ongoing, continuous process.
