

New Zealand All-vanadium Liquid Flow Battery

Overview

RKP's vanadium flow batteries are non-flammable, have a low risk of thermal runaway, making them the safest residential and commercial energy storage option in New Zealand. This ensures safe operation in all environments, including urban areas, industrial sites, and residential.

When to use "new" and when not to, in C++?

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.

All-vanadium redox flow batteries

The most commercially developed chemistry for redox flow batteries is the all-vanadium system, which has the advantage of reduced effects of species crossover as it utilizes four stable redox states of

Technology Strategy Assessment

With the promise of cheaper, more reliable energy storage, flow batteries are poised to transform the way we power our homes and businesses and usher in a new era of sustainable energy.
