[Difference between 'new operator' and 'operator new'?](#)

A new expression is the whole phrase that begins with new. So what do you call just the "new" part of it? If it's wrong to call that the new operator, then we should not call "sizeof" the sizeof

Is JavaScript's "new" keyword considered harmful?

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'

When to use "new" and when not to, in

C++?

You should use `new` when you wish an object to remain in existence until you delete it. If you do not use `new` then the object will be destroyed when it goes out of scope.
