

Niger Wetland solar System

Overview

This paper describes how the Niger Delta Wetlands Centre (NDWC) has tried to find the most effective ways to provide potable water using solar-powered systems, and to understand the challenges - both technical and socio-economic that must be overcome for communities to sustain.

Niger Wetland solar System

Topic: Geospatial evaluation of solar potential for hydrogen production

In this study, Geographical Information System and multi-criteria decision-making are combined to develop a framework for solar-based hydrogen site suitability analysis in Niger by

This project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy

Photovoltaic Water Pumping System in Niger

The use of solar energy in Niger, particularly photovoltaic energy, for water pumping is well suited in this arid and semi-arid area due to the existence in this region of an underground water potential, and a
