### power automate

I am writing a Power automate to copy emails from an Outlook mailbox to SharePoint. I am using Get emails (V3) and want to retrieve emails received on a particular date.

### Power Automate

I signed out and in multiple times in "power

automate". I also opened the "sharepoint app" in Office365 (whatever you're supposed to do with it) which worked fine. The sharepoint connector in

### **power automate**

The file should be available in "C:\Program Files (x86)\Power Automate Desktop" s I can see PAD nsole.Host.exe in the mentioned folder. Other way of making sure you are checking in

### **formatDateTime in Power Automate Desktop**

You are confusing Power Automate with Power Automate Desktop. The link you provide is for Power Automate, so those functions won't work in the PADesktop. There is an action named

### **Photovoltaic Energy Storage System**

Multi-capability of one machine: photovoltaic + energy storage mode, solve the small power supply in remote areas, and off-grid uninterrupted power supply, dynamic capacity expansion, peak cutting

### **Get email categories in Microsoft Power Automate**

But in Power Automate, if I use the "Send an HTTP Request" action (under "Office 365 Outlook") and send a request to that same endpoint, it returns a lot of the message information but

### **How to Read CSV file using Power**

### **Automate?**

You can retrieve the contents of the CSV file using the Get file content action in Power Automate/Microsoft Flow, and then using the Parse CSV action to transform the file contents into a
