

Size and area of solar panels

Size and area of solar panels

What's the difference between `size_t` and `int` in C++?

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

[What does the C++ standard say about the size of `int`, `long`?](#)

If the size of the `int` is that important one can use `int16_t`, `int32_t` and `int64_t` (need the `iostream` include for that if I remember correctly). What's nice about this that `int64_t` should not have issues on a 32bit
