System wiring of a solar installation

I was also wondering about needing to split the neutrals for essential and non-essential circuits. The inverter manual wasn't really too clear on this (or

Replacement Inverter Help

In any event, I think the most efficient thing to do for now is to keep it simple and replace the inverter with a basic inverter as close to the same size as my existing inverter.

[Inverter replacement compatibility . Information by Electrical](#)

This is an old grounded PV array with a string Voc of 500V. There is no drop in replacement for this inverter with a modern inverter without doing some work on the PV array to

NAZ Solar Electric Forum
