

Somaliland bifacial solar panels generate electricity

Overview

While modern solar panel performance has improved dramatically across the board, bifacial panels can generate up to 30% more electricity than traditional single-sided panels in optimal conditions. This increased production comes from their ability to capture light on both sides of.

Bifacial solar cell performance parameters

A bifacial solar cell (BSC) is a photovoltaic solar cell that can produce electrical energy from both front and rear side. In contrast, monofacial solar cells produce electrical energy only when photons are incident on their front side. Bifacial solar cells and solar panels (devices that consist of multiple solar cells) can improve the electric energy output and modify the temporal power production profile compared with their monofa
