

# **Synchronous installation of wind and solar complementary systems**

## Overview

---

This article aims to evaluate the optimal configuration of a hybrid plant through the total variation complementarity index and the capacity factor, determining the best amounts of each source to be installed.

## Synchronous installation of wind and solar complementary systems

### [Synchronous installation of wind and solar complementary systems](#)

In this paper, by taking the complementary system of wind-solar storage as the research object, a power prediction model of wind-solar storage system based on WPNN is established.
