

# The function of 20 watt solar panels

## Overview

---

20-watt solar panels are small solar panels designed to generate electricity from sunlight. They are great for charging batteries or powering small devices.

### 7 best 20-watt solar panels

To ensure clarity, transparency, and real-world usefulness, we ranked 20-watt solar panels based on how they perform in everyday situations - not just on paper.

[What does the exclamation mark do before the function?](#)

(function(){})(!); Lastly, ! makes the expression return a boolean based on the return value of the function. Usually, an immediately invoked function expression (IIFE) doesn't explicitly return

### What is "function\*" in JavaScript?

12 The function\* type looks like it acts as a generator function for processes that can be iterated. C# has a feature like this using "yield return" see 1 and see 2 Essentially this returns each

## [What is the \(function \(\) { }\) \(\) construct in JavaScript?](#)

What these functions do is that when the

function is defined, The function is immediately called, which saves time and extra lines of code (as compared to calling it on a separate line).

[var functionName = function\(\) {} vs function functionName\(\) {}](#)

The difference is that functionOne is a function expression and so only defined when that line is reached, whereas functionTwo is a function declaration and is defined as soon as its
