

Tripoli Airport uses photovoltaic energy storage container single-phase

Overview

The energy storage battery system adopts 1500V non-walk-in container design, and the box integrates energy storage battery clusters, DC convergence cabinets, AC power distribution cabinets, temperature control system, automatic fire-fighting system, lighting system and.

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
