How do I get the current user's username in Bash?

If you want to get the fullname and not the user id, you can get from `/etc/passwd` and get your line with `grep`; or simpler with `id -P` which get the line for the current user; and, in all case, something like that:

What is the purpose of "pip install --user"?

The `--user` option modifies all pip commands that accept it to see/operate on the user install folder, so if you use `pip list --user` it will only show you packages installed with `pip install --user`.
