

What does bifacial solar panels mean

The image shows a house with bifacial solar panels installed on its roof. In the foreground, there is a rack containing six solar inverters. To the right of the inverters, there are four circular icons: a hand pointing to a button, a globe, a battery with a lightning bolt, and a bell with a lightning bolt. Below these icons are four lines of text: 'easy to install and use', 'World wide Products', 'faster charging and discharging', and 'Multiple protection with alarm systems'. At the bottom right, there is a section titled 'Can save energy' with a paragraph explaining that battery capacity can be increased freely and flexibly according to home use, and that rechargeable lithium batteries use safe LiFePO4.

easy to install and use

World wide Products

faster charging and discharging

Multiple protection with alarm systems

Can save energy

the battery capacity can be increased freely and flexibly according to the situation of home use.

Rechargeable lithium batteries use safe LiFePO4

Overview

A bifacial solar cell (BSC) is a photovoltaic that can produce electrical energy from both front and rear side. In contrast, monofacial solar cells produce electrical energy only when photons are incident on their front side. Bifacial solar cells and (devices that consist of multiple solar cells) can improve the electric energy output and modify the temporal power production profile compared with their monofa.
