

# Which terrain is suitable for wind power generation

## Overview

---

Complex terrain with hills, valleys, or dense vegetation can create turbulence and reduce the efficiency of wind turbines.

## Which terrain is suitable for wind power generation

---

### [Optimizing Wind Power Plant Locations: Key Site Selection Criteria](#)

Open, unobstructed landscapes such as plains, ridges, or coastal regions are generally preferred because they allow for smooth airflow and higher wind speeds. Complex terrain with hills,

### **Glen Mills Garden Cafe**
