IEA: Global photovoltaic module production capacity

According to the International Energy Agency (IEA), global solar panel production capacity will exceed 1.5TW by 2035. Its latest report, Energy

Global photovoltaic electricity production

China is the world leader, accounting for 47% of global installed solar capacity. Brazil has made particularly strong progress (80% from 2021 to 2022, 40% from 2023 to 2024), its output is

Snapshot of Global PV Markets

PV energy production reached more than 10% of the world electricity consumption for the first time. The theoretical penetration rate of PV has grown across the world as capacity increases faster than

Executive summary - Solar PV Global

Supply Chains

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules),

Winter 2024 Solar Industry Update

In 2023, global PV production was between 400 and 500 GW. Despite global price drops across the PV supply chain, PV manufacturers have generally remained profitable, thanks to increases in sales
